

HoloVet

Veterinary Holoaram Capture

We Filmed The First Veterinary Hologram Surgery in History.

Imagine performing surgery with a mentor guiding your hand from a previous holo-surgery recorded superimposed on yours. Teaching students surgery in a hologram and allowing them to get a feel for it in first person before doing the real thing. And of course recording animals before they die in an immortal hologram for the owners.

It's time to surpass human medicine. Visit vetxps.com/holovet for more.
